Preventive Services for Children and Adolescents

A = Annotation

System alerts patient/parent or provider of needed preventive services A

2
Perform risk stratification and health assessment A

Use every opportunity for prevention:

- Patient/parent contacts clinic system for acute or chronic medical problem
- Patient/parent contacts clinic system for preventive services visit
- Scheduling system initiates service

Level I

Preventive services which providers and care systems *must* deliver (based on best evidence) (see Table 1)

- a. Childhood immunizations series
- b. Chlamydia screening
- c. Vision screening

Э

Level II

Preventive services which providers and care systems should deliver (based on good evidence) (see Table 2)

- Cervical cancer screening
- · Injury prevention counseling
- Blood lead testing
- Infant sleep positioning and SIDS counseling
- Neonatal screening
- Obesity screening
- Tobacco use screening and brief intervention in adolescents

6
Assessment complete:
patient/system
up-to-date

- Level I services are organized by evidence of prioritization.
- Level II services are organized based on evidence of prioritization and alphabetized.
- · Levels III and IV are alphabetized.

5a Level III

Preventive Services for which the evidence is currently incomplete

- Child maltreatment screening
- Clinical breast exam screening
- Dental and periodontal disease counseling
- Developmental/behavioral assessment testing
- Dyslipidemia screening
- Hearing screening
- Iron deficiency screening
- Nutritional counseling
- Physical exam

Α

Α

Α

- Development dysplasia of the hip screening
- Scoliosis screening
